

Dipartimento di Architettura e Territorio – dArTe

Corso di Studio in Architettura quinquennale – Classe LM-4

Degree course	5 Year-Degree course in Architecture
Course code	
Lecturer	Prof.O'Sullivan
Course name	English
Disciplinary area	
Disciplinary field of science	
University credits - ECTS	8CFU
Teaching hours	80 hours
Course year	1
Semester	Annual

Synthetic description and specific course objectives

The English course is made up of on-line lessons and frontal lessons both of which cover the grammar programme and the technical language relevant to the field of Architecture. The main objective of the course is to provide students with the necessary linguistic skills in English allowing them to read Architectural texts, to understand and take part in discussions, seminars and lectures in the subjects that they follow during their academic career

Course entry requirements

The English language on-line course provides lessons on basic English grammar which will prepare the students for the frontal lessons where both English grammar and specific language will be studied in-depth.

Course programme

The programme consists of the study of English grammar (III level), the comprehension of Architectural texts and preparation for the oral examination. (The study of specific terminology for conversation combined with discussion on Architectural topics).

Expected results

The course is principally aimed at a knowledge of the English language which will allow the students to understand Architectural texts and lectures.

Course structure and teaching

On-line lessons 30 hours

Frontal lessons 50 hours

Exercises carried out during the course of the lessons to consolidate the subjects and the topics covered in class.

Student's independent work

Self-study will be effected through the lessons on-line and homework assigned in class, thus consolidating all classwork.

Testing and exams

Students' work and progress will be evaluated on the basis of the lessons done on-line, the homework assigned in class and the final examination
