

**QUESITI PRIMA PARTE PROGRAMMA DEL CORSO DI COSTRUZIONI PER LE  
INDUSTRIE AGRARIE 20105-2016**

A tuo giudizio, quali sono i fattori che più di altri possono condizionare la scelta localizzativa di un insediamento produttivo agroindustriale? (commenta la risposta)

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Quali metodologie di analisi e di valutazione dei fattori è possibile adottare per la scelta della localizzazione ottimale ?

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

A quali importanti funzioni devono assolvere le strutture fondali e come possono essere classificate?

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Come l'orientazione dell'edificio può incidere sulle condizioni ambientali interne?

---

---

---

---

---

---

---

---

---

---

---

---

---

Quali sono i principali standard urbanistici da considerare nella progettazione di un edificio agroindustriale?

---

---

---

---

---

---

---

---

---

---

---

---

Quali sono i requisiti massimi richiesti alle pareti di un edificio produttivo alimentare?

---

---

---

---

---

---

---

---

---

---

---

---

Quali sono i requisiti massimi richiesti ai pavimenti di un edificio produttivo alimentare?

---

---

---

---

---

---

---

---

---

---

---

---

Quali sono i requisiti massimi richiesti alle finestre e aperture di un edificio produttivo alimentare?

---

---

Cosa si intende per processo edilizio nell'industria agroalimentare? (commenta la risposta con la tua interpretazione)

---

---

---

---

---

---

---

---

---

---

---

---

Come la vegetazione può influire sull'edificio e quali sono gli accorgimenti da adottare?

---
